PETITION TO REQUIRE WARNING LABELS FOR ACETAMINOPHEN (e.g. TYLENOL®)

TO THE HOUSE OF COMMONS IN PARLIAMENT ASSEMBLED

We, the undersigned residents of Canada, draw the attention of Government to the following:

THAT acetaminophen is the most common pharmaceutical involved in unintentional and intentional poisonings in all age groups in British Columbia;
THAT both acute and chronic acetaminophen overdose can cause potentially fatal liver toxicity;
THAT there are over 250 products on the Canadian market that contain acetaminophen; and
THAT appropriate warning labels would help increase public education and reduce the occurrence of unintentional poisonings,

THEREFORE, we petitioners call on Parliament to require warning labels for products containing acetaminophen indicating that acute and chronic overdose of acetaminophen may lead to fatal liver toxicity
